

THE INTERNET

The Internet is a network of networks, connected worldwide. All kinds of information can be found on the Internet, from literary criticism, to stock reports, from weather reports to recipes, from gardening tips to car prices. There is something for everyone on the Internet, you just need to know how to find it.

WORLD WIDE WEB

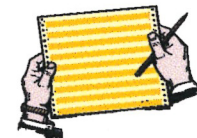

WHAT IS IT?

Often referred to as the Web, WWW, or W3, the World Wide Web is a retrieval system for materials on the Internet. It can identify, locate, retrieve and display files of all types, including pictures, video, and sound. Using hypertext, it connects online resources into one "seamless web". Each document includes links that you can use to follow facts and text to other documents, text, or files. In order to navigate the World Wide Web, you must use an Internet browser.

GUIDELINES FOR USE OF THE LIBRARY INTERNET WORKSTATIONS

► Who may use the Internet Workstations

Internet workstations are available to all adults. It is recommended that county residents have a Jasper County Library card.

Children between the ages of 10 and 17 may use the workstations after an Internet Use Permission Agreement has been signed by their parent or guardian, or if they are accompanied by a parent or guardian at the workstation.

Children under the age of 10 may use the workstation *only* when accompanied by a parent or guardian.

Patrons must agree to terms of the JCPL Acceptable Use Policy in order to use the Internet workstations. This policy is posted at each workstation, and access to the Internet will be given only after the patron indicates with a click of the mouse, that he/she agrees with the terms of the policy.

► Reserving a Workstation

No reservations will be accepted for Internet use.
